

Welcome to Aunt Flo Assistant

what is today's date

2025/05/12

AI Hello! Ask me anything about Periods 😊

AI The color of your discharge can vary depending on your menstrual cycle. Generally, it's normal for discharge to be whitish or off-white in color. or consistency of your discharge, such as a yellowish or greenish tint, it could be a sign of an infection. It's always best to consult with a healthca your discharge or any other menstrual symptoms.
